

Founded in 2001, Hongsam Digital Science & Technology Co., Ltd is engaged in research and production of professional inkjet inks for textile printing & non-woven fabrics printing, digital image, art reproduction & interior decoration, office & home, advertisement printing & banner, digital printing, publishing, industrial application, etc. fields.

Typical products: Four-color, six-color, seven-color, eight-color, eleven-color and twelve-color pigment inks suit for Epson, Roland, MIMAKI, MUTOH, etc. printers. These inks satisfy digital image, digital printing, art reproduction, outdoor application which needs high lightfastness and high weather fastness, and using water-based system, these inks can also prolong the life of print heads. As adopting scientific color system, for any printer model, Hongsam's ink provides you widest color gamut and saturation, winning a good reputation all around the world.

As the first professional inkjet ink manufacturer that releases compatible pigment ink around the world, Hongsam keeps developing and completing its product lines.

Hongsam's pigment ink system for thermal printers has remarkable good features. Firstly, refined and stable nanometer pigment particles are distributed evenly in the inks whose shelf life is as long as two years to make sure no clogging of print head. Secondly, Hongsam ink's scratch resistance system improves the scratch resistance on all media, especially on RC waterproof photo paper, which even surpassed OEM ink. For customers requesting low costs, Hongsam has developed water-based dye inks for all printer models. For users of Novajet 750/1000i, HP 5000/5500 around the world, Hongsam has developed anti-UV dye ink. Though the price is low, it can meet most of your printing needs. Moreover, this series of inks will do no harm to your print head. The long life of your print head and the low average costs will amaze you.

Ink tank/refill cartridges

Detailed Product Description

Ink tank/refill cartridges use for Canon
iPF8000/9000,8000S/9000S,8100/9100,8110/9110is with
high quality at a reasonable price

**Declaration : All brand names , registered logos ,and
copyright in this description are the property of the
respective company. They are used for identification
purpose only.**

Printer Model:

Ink tank/refill cartridges use for Canon iPF8000/9000,8000S/9000S,8100/9100,8110/9110

Colors:

C,M,Y, PC,PM,R,G,B,GY,PGY,MBK,BK

Features:

1. Brand new and 100% compatible with OEM printer
2. One time chip can display ink level correctly
3. 700ml large volume will reduce your costs largely
4. Hongsam premium pigment ink inside represents you amazing prints with high resistance to water, light and scratch
5. No problem of clogging

Applicability:

Mainly for fine art reproduction, digital image, etc.

Solution:

Having this kind of compatible cartridge, you just need to replace one cartridge after certain color is finished.

Heat transfer ink,subliation ink,inkjet refill ink for piezo print head

Detailed Product Description

Heat transfer ink,subliation ink,inkjet refill ink for piezo printer, especially for Epson,ROLAND, MIMAKI, MUTOH

Hongsam heat transfer inks are for piezo print head printer,especially for Epson,ROLAND, MIMAKI, MUTOH four-eight colors printer

Printer Model:

Heat transfer ink,subliation ink,inkjet refill ink for piezo print head

For all EPSON four-eight colors printers, ROLAND, MIMAKI, MUTOH etc. other piezo inkjet printer and Digital Textile Printer.

Colors:

C,M,Y,LC,LM,K,DK

Features:

- 1.High stability and free of clogging print head.
- 2.Perfect color saturation and deoxidization
- 3.Wide color gamut and good compatibility of colors can represent you perfect performance.
- 4.High resistance to light, rubbing and washing.
