HCC (Specialty Products) Limited Liability Corporation

HCC (Specialty Products) LLC it a Consumer Products Manufacturing Corporation, HCC it the initial of the owners and (Specialty Products) (Specialty Products) this company will be doing the specialty product no one else can do, LLC it a Limited Liability Corporation it will have insurance for it customer,

That it if you hurt but any of the product make by this company their insurance to cover you injured just have to prove to the insurance company that you were injures by us and they have set feed for injures, like most in insurance company lose a hand or a foot there are set amount they pay if this company injures you in any way with it products, and you will not be dealing with this company if you set for injures you will be dealing with a insurances company instead of

HCC (Specialty Products) LLC but if your injures their will be insurance to take care you and your need Now for all those old

stereotypes of about how bad black are here of at any time in the dealing with this company you're not treated with the upmost respect or better than our completers your get your order free after set -up and stabilization I means it at any time any of the employee those corporate does not perform as a professional or insult you or one of your staff member in their dealing or association with this company where were e the blame you get your order they dealing with at the time free, i cannot take credit for this this it the way my wife store treats it customer when one of them it mistreated by a employee of mined we do the same just to prove how committed we are to service and quality How that for put your butt were your mouth it

And I fire any employee who does not or will not committed too these standard including my daughter of which it no worry taught to give the same Christian custody to other as I was

The new technology need to make these products available to you was developed by the owner and inventor of this corporation

The household chicken a food processor for processing cutting up birds and chicken design and invented to save you money on your food bills, the energy saver doors and screen doors design and invented to save you money on your heating and cooling bills and repair of your homes, the floor vents and grates design and invented to save you money on your heating and cooling bills, the dry wall restore design and invented to save you money on wall repair home improvement and repair, the hand saver wrench design and invented to save you money on auto repair and too allow professional who repair auto too get more work done in a day and their fore make more money by increasing the number of jobs they can do some other thinks you can you expect

these and the product of this company to do and will always be consideration of this company as too what product to put out on the shelve it in store will be based on the same criteria how much time, work and money we can save you consumer or how their valued to you the consumer will get form will determines what and how good a jobs were doing as inventor and design, the poetry book poem of the light wrote to inspire people to check out the Christian a god and his think and to allow an income while I working to get this company up and stable and making money on my Engineering and inventing skills

I do grantee these product at the prices mention not only that, but assure they will pass and ahead to all the below certification before delivery to you company or site Certification: CE FCC FDA GS CCC CB HACCP RoHS UL CSA C-TI CK SAA SGS PSE MIC-Mark EK-Mark VDEaol.com;

Process for Start-up and Set- up to Accomplished Stabilization

the products being made in the country of China the household appliance all models, and the book being printed their the energy saver vent it being toll and modeled there, also the socket for the wrench set being modeled there, as you can see the vendor are from their making most of the components for startup I can get your their name if need all set up and bid in and selected start will be easy really and the tool for the dry wall restore and patch made their also, I've also component manufacture of the mess and paper line up for the dry

wall patch and restore form all over including Viet Nam and other obviously if all order flow into the bank there will be multi plus vendor for all those think many have limited that we required more than they can made as to multi-vendor for all this stuck startup will be easy just mostly assembly at my home plant except for the doors and the extension for the wrench set will be total manufacture at my corporate headquarters and start ship plant were every that be it will be decide after start l/c are in the bank of which I will be using the bank of china for my corporate bank of which I know I other company can used that or any other bank on the plant that legist I leave the legist think up too you them the bankers, do not contact me put your order and l/c in the any of you choice contact my bank they will be collecting the money if you bank if suitable to them it suitable to me, let them contact me , with an ax copy of the l/c to sign we start the process this until start over then if you prefer when regular communication are set up contact me but you will be dealing with my corporate bank anyway too get this process started , done this many time working for the company here command place to do it this way

What the hold waiting on you buy these product especially the one who send inquired asking permission to buy these product and it been given but just disappear with no expert nation at all Simple send your order to and proof of pay to my corporate bank listed in my catalog they will fax a copy to my location where I meet with a banking official sign the letter of credit paper work then your get your product a fax copy remember it as good as a hard copy anywhere, then I goes the bank I the information concern in vendor and my hole plan to get these too you and we get started on the work as you can see with the vendor already pick and with the little fabrication I be doing in this startup of my own employee that the suck that old not being done in another location but completed fabricated at my plant that not of the shelve or simple haven to stay on top of a vendor to make sure they get the component they building right start will be very

easy and you probably see these hitting you dock in about 45 days but too be safe I allow or telling everyone 75 days

Harold C Christian

The Household Appliance Division

The new technology need to make this product available to you was developed by the owner and inventor of this corporation

All engineering and design work it done to create this technology

now to order simple send purchase order and deposited proof of payment in the form of a letter of credit in some bank and inform me and my corporate bank what and where the proof of payments it so we can verify it

The Household Chicken Cutter: Patent pending # 1890)

An electronic household appliances)

White Model No. 340032-2008-1 EUR 125.00 or \$163.75

Black Model No. 340032-2008-2 EUR 125.00 or \$163.75

Green Model No. 340032-2008-3 EUR 125.00 or \$163.75

Prices includes instruction book, coupons and a small cook books 2 set of Blade plus a specialty spoon to remove chicken and shipping paid on all replacements due to default products or workmanship These products will cut up a whole fryer or chicken within 27 seconds or less with just the push of a button. They are Table top appliance about the size of a toaster oven or a Little Larger with fit a whole a chicken or small turkey Will cut in four different Blade arrangements this chicken cutter will save you \$ 2.50 to \$ 3.00 per. Chicken or bird in us dollar, that the different between What you would pay for a chicken or bird in the store in The us if you brought one already cut – up, but why do that when this machine will do it in 27 seconds

Saving you All that money and work, and time, how could you customer Resisted this and As soon as your order I'll bring Case Engelen the President of Titoma who has 4 plants and A manufacture group there in Taiwan waiting to get started In the process of building theses but you must contact me First because of a none discloser contract you could add As a market up of \$ 25.00 or more to this, you decide You know your clientele more than I'm this appliance Will still have jump off the shelve, and be below most Product

That are already setting in their house such as Coffee pot, that sell for \$300 or more and convection oven That sell for \$165.00, products that have everyone already has even with this Unheard of market-up for retail stores they still fly off The shelves, when your normal mark-up for Something likes \$5.00 dollar, not \$25.00 or \$30.00 and still below product that just hit one of the normal Requirements for a good consumer product, saving time,

Products will be made of food contact stainless steel and Plastic, There will also be three other different colors, This is the most need appliance for the home maker in Today's world, it actually will do the only task that the Home maker doesn't have a machine or some appliance Already to do that labor intense and costly and hard work, And dose it in 27 seconds, Notice the sale prices of the whole fryer a \$0.39 to \$0.50 saving per lb.

These product will go thru a endurances test here in America all household appliance will have to pass a 500 hour continually running test without failure so will all my product conform the that as a minimal standard Including no rust or degrade of material performances, electric chock or shorts or any kind of electrical problem that can cause fire or any kind of electrician situation or food contamination but go thru the rest not fail in any of these doing or after the test finished in order to pass, other words at the end of test these appliance must be operational without any problems

These test and grantee are made by the manufacture of these products over

**News flash how true it what I said they so affair of you list
 en they trying to get me lock up again used my intelligent and avoid
 the individual out the blue had serious problem with me which means
 he someone send too actually pick a fight trying to get you in trouble it
 what they do too you so you're not around like when they post that
 letters of credit for the household appliance to get set up out of here
 over there would be doing but you see they done so ,much I expect it
 when i closed to winning , being a ex veteran you must be carefully if
 you used violence's on a surf villain that you had no other coursed but
 too in order to save your life because of the hand to hand combat
 training you have but they try too induces fight to get you out of
 commission at time lie these but your see i aware of that can easy
 avoid such thinks, so good ahead post those letter of credit as you can
 see especially you super stores in Europe it only EUR 1,673,500.00**

**I a manufacture in Taiwan (Titoma) who done not need to set up
 a plant all ready to tool this up and start production which get product
 to start shipping to you in these within 45 days for this household
 appliance it just take an order of only 10,000 pieces get that start ,
 that was supposed to be the front line product to get out on the shelve
 first in the store fund all the rest with those profit but sine I been
 delayed starting every think up together looking forward to you getting
 that letter of credit information to the bank of china so we can start ,
 this quaintly of product will allow tooling cost and my cost too
 relocate over there and get every think else I need done here and
 there to accomplished completed started of all products as plan
 originally Customers of these supper store in Europe you know that
 just a EUR 1,673,500.00 not even a sample orde4r for one of them and
 a few if you could have these product these appliance in the store on
 the way to you in 45 days, and the ensuing process my whole company
 would get set up and you spend years with new product s flown out to
 the shelve as long as I am able to do it really**

The screenshot shows the Allrecipes website interface. At the top, there is a navigation bar with links for Recipes, Menus, Tips & Advice, NEW! Community, and Shop. Below the navigation bar is a search bar with the text 'Search Allrecipes.com' and a 'Search' button. To the left of the main content area is a sidebar with 'Related Tips & Advice' and a list of categories: Tips and Advice, Cooking School, How-Tos, Meats & Grilling, Budgeting, and Photo Tutorials.

The main content area features a large image of a whole chicken on a cutting board. To the right of the image is the title 'Cutting Up a Whole Chicken' and the byline 'By: Allrecipes Staff'. Below the title is a short introduction: 'It takes more than one go at cutting up a chicken to become an expert. However, once you've got the hang of it, you can cut up a chicken in very little time and with hardly any effort at all! Perhaps the most important reason to learn how to cut up a whole chicken is that it will save you money. Buying a whole chicken is cheaper than buying pieces, and the leftover parts are ideal for forming the backbone of soup stocks. The same method can be used for cutting up other fowl like duck or squab.'

Below the introduction are four numbered steps, each accompanied by a small image showing the step in progress:

1. Place the chicken breastbone-side up on a clean, flat cutting surface.
2. Use a standard, sharp kitchen knife to slice off the wing joints. The wings can be set aside and reserved for stock. One breast and leg is removed at a time. Follow steps 3 through 5 to remove the breasts and legs.
3. Make a shallow incision running along one side of the breastplate.
4. Deepen the incision by slicing into the chicken toward the rib cage. Pull the meat away from the rib cage as you slice down. As you progress further into the bird, slide the knife off of the rib cage repeatedly to ensure that you are removing any

TIME SAVED

You know my wife worked in retail and with an end cap a big open sale to blow out your first shipment with a TV demo going the woman will be fighting over this appliance no one will want to wait for a rain-Check

**Sent: Wed, Dec 15, 2010 4:43 pm we review books. Once the work is in
 book form we will be happy to review it for you. Shirley Roe Managing
 Editor all books Reviews www.allbookreviews.com the review after
 they through I was going to be fooled into
 paying someone to published this book and I quote good author do not
 paid to publishes their book they publishes for free and refer me to two
 publishing company Harold: All books Reviews is not a publisher, but
 here is some advice. Be very careful of so called poetry contests that
 announce you as the winner and then want to charge you \$50-\$100 to
 buy the book where your work will appear on one page. Do not be
 fooled into thinking that a publisher will spend \$32,000 on your book or
 anyone else's. If you want your poems published, go to www.lulu.com**

and publish it for free you can also try www.publishamerica.com where they will publish it for you for free. Good authors do not have to pay to be published in this any and age Shirley Roe Managing Editor All books Reviews www.allbookReiews.com

poetrycontests12

Sorry sir

I'm not doing individual poems anymore I'll be publishing a book very soon of 50 Poems I be sure to let you know when that it available for purchases

As you know sense I'm writing a book with these poems they cannot win a contest

But thanks anyway

Thanks

Harold C Christian

I grantee this book and all the material it make with for wear and fading, for the life of the original owner, this book to meant as a keep sake to be hand down as a gift to love ones so it will be replace at no cost for any material failure if you're the original buyers, that a failure it

Hope

One drudge thru day after day
 Thought pressed on all sides
 By common and uncommon trails and tribulations
 Oppression of many diversity and different things
 Follow in the content of their hearts
 Being driven by that inner sprit
 That yearning for the completion and the far fill meant
 Of the content of the heart
 Which comes with completion of all
 Like a carrot golden and ripe
 That caused you to presses on
 And insure that you done fail
 Surely, you press on
 Hope in for things wished for
 And things promises
 Promises make thru the holy sprit
 Promises that never disappoint.
 Hope

HCC (Specialty Products) Limited Liability Corporation

Corporate Web Page: <http://www.blazelead.com/Hcc-LLC/>

This is a manufacturing corporation involved in the sale and manufacturing of new consumer products for the consumer products market with its focus on new products that fit the most need consumer problem at that period of time hoping to fill that need void all this I asking every always with new product to improve the lives Just deposited the proof of payment at your corporate bank in the form of letters of credit with the product your ordering of...consumer

Here are the products being made in the country of China the household appliance all models, and the book being printed their the energy saver vent it being totally and modeled there and they be expedite in the price of tools in the piece part price? Of all plastic parts will be done this way and the total cost of the household appliance will be done? Not need a letter of credit to get component any tooling done or a assembly line or plant set up for this product and the book just need order in the bank again how easy it that this way how easy it that also the socket for the wrench set being modeled there, as you can see the vendor are from their making most of the components for start up I can get your their name if need all set up and bid in and selected start will be easy really and the tool for the dry wall restore and patch made their also, I've also component manufacture of the mess and paper line up for the dry wall patch and restore form all over including Viet Nam and other obviously if all order flow into the bank there will be multi plus vendor for all those think many have limited that we required more than they can made as to multi-vendor for all this stuck start up will be easy as can be mostly every think it off the shelve , I explaining all this to get rid of the liars people are going behind my back saying i need help or this company not ready to start every think on my resume it true ,I take product for concept thou finished for the company I've work that from a design layout too running of the end if an assembly line the finished of the design process and as a contract or brought in or bring a product to life for someone from design layout to a working solid model , and I do all this by myself I've no help at the end of the day I write a engineering change notices and sign it the point of no return that will put all the process and tool a making ad setup assembly line set purchase in off all component all the work to get that running of an assembly line will be put into place by that ENC , why tit ha the point of no return and mistake I made before I sign that ECN will take another ECN to correct a recorder mistake and even eon must state

why you wrote whether to Create a product get it in the system or to correct one you wrote all the place I Work how many ECN have wrote to correct myself my energy will run and check but if they do you know I work their dare them to check, these documents are more complicated then patent and some legal documents really we write even if you make a mistake on the documentation you need to wrote a ENC to correct that documents just mostly assembly at my home pant except for the doors and the extension for the wrench set will be total manufacture at my corporate headquarters and start ship plant were every that be it will be decide after start letter of credit are in the bank of which I will be using the bank of china for my corporate bank of which I know I other company can used that or any other bank on the plant that legist I leave the legist think up too you them the bankers, do not contact me put your order and letter of credit in the any of you choice contact my bank they will be collecting the money if you bank if suitable to them it suitable to me, let them contact me , with a copy of the letter of credit to sign we start the process this until start over then if you prefer when regular communication are set up contact me but you will be dealing with my corporate bank anyway too get this process started , done this many time working for the company here command place to do it this way

Simple send your order to and proof of pay to my corporate bank listed in my catalog they will fax a copy to my location where I meet with a banking official sign the letter of credit paper work then your get your product a fax copy remember it as good as a hard copy anywhere, then I goes the bank I the information concern in vendor and my hole plan to get these too you and we get started on the work as you can see with the vendor already pick and with the little fabrication I be doing in this startup of my own employee that the suck that old not being done in another location but completed fabricated at my plant that not of the shelve or simple haven to stay on top of a vendor to make sure they get the component they building right start will be very easy and

**you probably seethes hitting you dock in about 45 days but too be safe
I allow or telling everyone 75 days**

How To Order

Re: Our File No. 48560

Dear Mr. Christian:

I reviewed the patent information you sent me, which included the following patents issued to Harold Christian:

- #1890, issued 8/14/2001, for a ~~air~~ door vent;
- #2814, issued 12/27/2002, for a door vent;
- #1646, issued 12/27/2002, for a wrench;
- #2814, issued 12/26/2002, for dry wall patch;
- #2814, issued 5/23/2002, for a screen door.

Provisional patent #1890 has expired, as of 8/14/2002. You also sent me a notice regarding non-provisional patent application, dated 9/10/2002, which appears to have been filed too late to extend the filing date for #1890. For the remaining provisional patents, you must file a corresponding non-provisional application, during the 12-month pendency period of the provisional application in order to benefit from the earlier filing of the provisional application. I have included information from the USPTO website regarding the process for Provisional Application for Patents.

You have asked for advice, in your fax cover sheet, stating you want me to supply information necessary to keep the patents activated or to finish the process if necessary. In order to keep your patents activated and to finish the process, you must file non-provisional patent applications for each of the provisional patents stated above, during the applicable 12 month pendency period. I have also included information from the USPTO titled "A Guide for Filing a Provisional (Utility) Patent Application." In that guide, the USPTO states: "A patent application is a complex legal document, best prepared by one trained to prepare such documents. After reviewing this guide, you may wish to consult with a registered patent attorney or agent."

My recommendation is the same. We would be happy to make a referral for you to a patent attorney in Kansas City, if you call or write me making the request for a referral. As a member of

COPY

a list of my patent as you can see the number match the number on these add so do the name they were all done by me and the patent also wrote by me to start this corporation so i could recieve the produce of my professional will hire staff and employee too maunufacture and sell these and other

Main Customers

Retail stores, hardware stores, super markets, discount stores, and Whole sales store of any kind do not sell to general public nor can this company spam any one sell too business customer only

This is a manufacturing company I sell products to anyone who will buy them min. normal order it 1000, but that a small normal order are usual larger,

THIS IT THE NORMAL FOR START -UP

the products being made in the country of China the household appliance all models, and the book being printed their the energy saver vent it being toll and modeled there, also the socket for the wrench set being modeled there, as you can see the vendor are from their making most of the components for startup I can get your their name if need all set up and bid in and selected start will be easy really and the tool for the dry wall restore and patch made their also, I've also component manufacture of the mess and paper line up for the dry wall patch and restore form all over including Viet Nam and other obviously if all order flow into the bank there will be multi plus vendor for all those think many have limited that we required more than they can made as to multi-vendor for all this stuck startup will be easy just mostly assembly at my home pant except for the doors and the extension for the wrench set will be total manufacture at my corporate headquarters and start ship plant were every that be it will be decide after start l/c are in the bank of which I will be using the bank of china

for my corporate bank of which I know I other company can used that or any other bank on the plant that legist I leave the legist think up too you them the bankers, do not contact me put your order and l/c in the any of you choice contact my bank they will be collecting the money if you bank if suitable to them it suitable to me, let them contact me , with an ax copy of the l/c to sign we start the process this until start over then if you prefer when regular communication are set up contact me but you will be dealing with my corporate bank anyway too get this process started , done this many time working for the company here command place to do it this way

What the hold waiting on you buy these product especially the one who send inquired asking permission to buy these product and it been given but just disappear with no expert nation at all

Simple send your order to and proof of pay to my corporate bank listed in my catalog they will fax a copy to my location where I meet with a banking official sign the l/c paper work then your get your product a fax copy remember it as good as a hard copy anywhere, then I goes the bank I the information concern in vendor and my hole plan to get these too you and we get started on the work as you can see with the vendor already pick and with the little fabrication I be doing in this startup of my own employee that the suck that old not being done in another location but completed fabricated at my plant that not of the shelve or simple haven to stay on top of a vendor to make sure they get the component they building right start will be very easy and you probably seethes hitting you dock in about 45 days but too be safe I allow or telling everyone 75 days HCC (Specialty Products) Limited Liability Corporation,

Finials officers

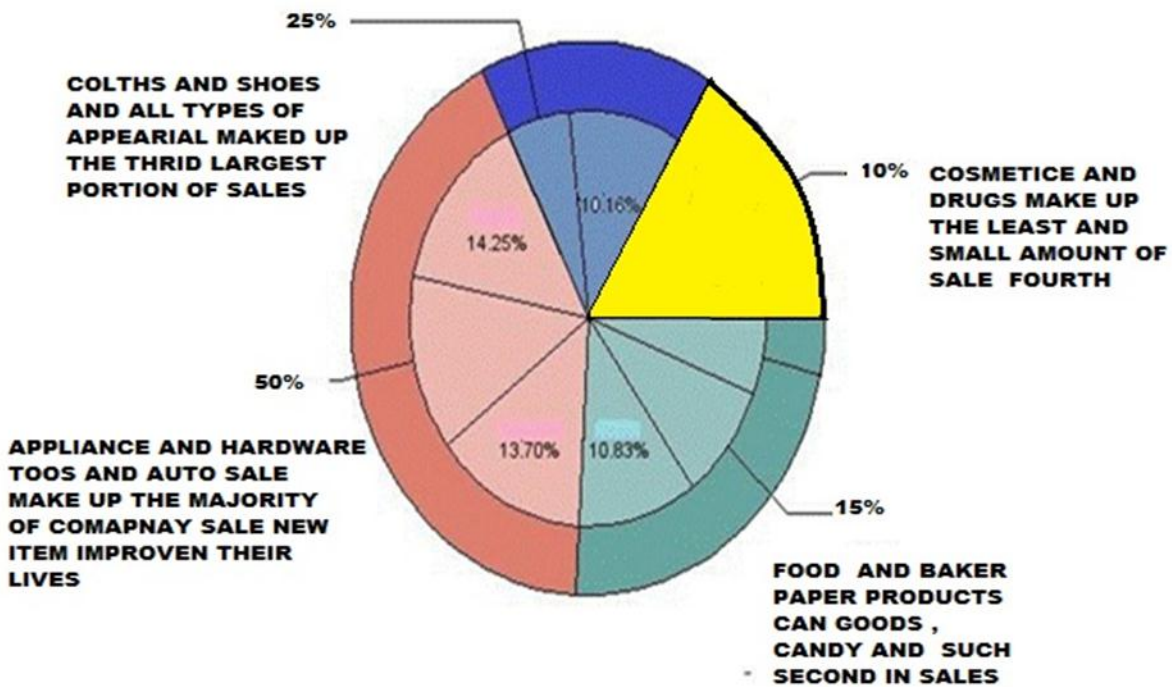

President: Mr. Harold C Christian

Second: Control (to be Name Later)

Third: Vice President of Operations (to be name later)

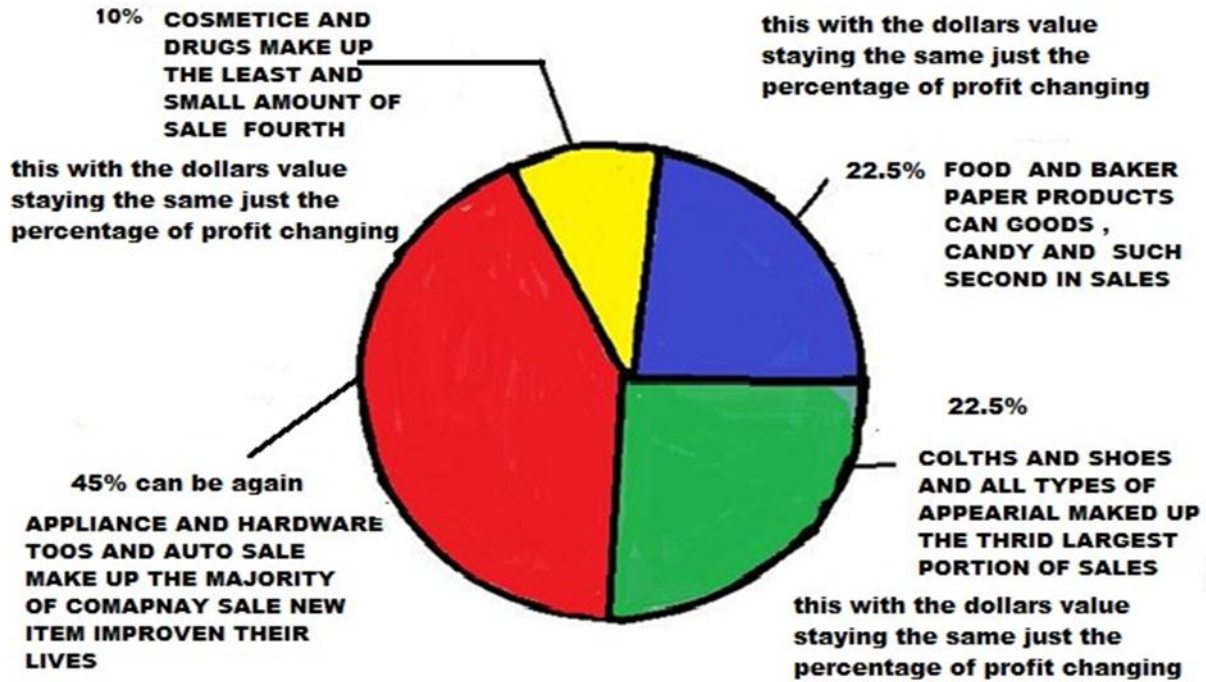

All that you see here and that listed it according to the standard business practice also as it was done also by Westinghouse, Ford, Preston trucker, and a lot other Engineer and designer like WestonHouse starting for out from working at home in their office and garage grown it company into large successful company out here in the work every engineer or drafting dream in starting at career in engineering, and has been it mine also

And I think god and you for the opportunity to do this server your consumer products needs

How your charts look check your chart go back 30 or 40 year , how much of your profit were from small household appliance , hardware , auto tools and such , how much now from cthose veris colths and food products , want to change the

Now surpose with the induction of food and cloths and make up right just surpose same those department had much nmovement as then they still can get your order and watch those types of figures retrun and profit go up accordingly

How your charts look check your chart go back 30 or 40 year , how much of your profit were from small household appliance , hardware , auto tools and such , how much now from cthose veris colths and food products , want to change the

Now surpose with the induction of food and cloths and make up right just surpose same those department had much nmovement as then they still can get your order and watch those types of figures retrun and profit go up accordingly

How you get these profit and percentage back? a company head by a great inventor that can supply the types of new products you had then like my self supply in the types of products you had bach then
