 Getting started

Pls check the following functions on the product.

1. Indicator light
2. Volume control button + / -
3. Charging socket
4. Call/ end button.

Charging

You have to charge for the mini handset before use it . An USB line is provided to connect with your computer to charge. If you wanna use other charger, please ensure it's rated DV 5V 200-500mA.

Pairing the mini handset with a Bluetooth cell phone.

1. Firstly ,Open your cell phone's bluetooth function. Then search for the bluetooth devices.
2. Secondly ,Turn the cellphone's bluetooth functions on, hold down the multifunctional button until the indicator light flashes blue and red alternately.
3. Thirdly, search for the bluetooth device which named KK T-02 . When your cell phone find the device, pls confirm to connect it. If remind you to input security code. It's 0000.
4. You only need to pair it with your cell phone once. Using the MINI Bluetooth handset after the initial connection, you only do is switching it on and it will connect with your cellphone automatically.
