## About us

The French Roller Shutter expert in China.

We only provide best quality shutter, because quality is the most important point for a reliable installation. **Our objective is to be the best quality roller shutters and parts provider from China,** regarding products as well as services.

Our team is composed by logistic expert, who can help you to import your products all around the world, easily and quickly. Our employees can speak English, French and Chinese.

As we are roller shutter expert, we know all the problematic about installation and reliability. We will help you to choose the best product for your real estate project.

### Our key benefits:

- We ensure the quality of products, with European exigencies
- Reactivity and seriousness
- Competitive prices
- Experimented team

## What is a roller shutter?

An electric Roller shutter is composed by:

- 1 - Slats
- 2 - Top box and side plates
- 3 - Transmission:
  - Tubular motor
  - Tube
  - Other transmission parts (Idler, anti lift systems, etc.)
- 4 - Guide rails

**Roller shutters are tailor made products.** Therefore, if you want to enter into the roller shutters market, you will have to invest in heavy and expensive equipments in order to made it according to your customers need.

**That's why, buying your roller shutters through China France Shutters will allow you to be more competitive and to quickly gain some market share.**

We also offer a wide range of roller shutters components and accessories. All the parts are available separately.

Aluminum slats and tubular motors are our best sales, thanks to their very high quality level; these are the favorite shutters components of our customers.

**Facade installation**

**Middle installation**

**Reverse installation**

*Usually, roller shutters can be installed in 3 different ways (cf. above pictures). All our roller shutters can fit with these 3 installation methods.*

*Note: it is necessary to specify which kind of installation is required before placing an order.*

## Roller shutter's key benefits

Fine looking, discreet and with an attractive design, the roller shutter perfectly fit with all kind of architecture, in every conditions.

Improve home safety and deters burglars. The roller shutter is the first way to protect a house, because the windows are the weakness point of any house.

Effectively insulates a house against weather conditions, and allows up to 30% energy saving.

Allows the user to sleep comfortably and to optimize the brightness of the room. The roller shutter also protect from external noise by significantly reducing noise pollutions.

Effective protection against mosquitoes and other pests. Allows the user to sleep with opened window.

Protect your privacy. The roller shutter prevents your neighbors from knowing the slightest details of your private life

## Our product range

### *Slats:*

- *Foam filled slats*
- *Extruded slats*

### *Roller shutters*

### *Combos windows/shutters*

### *Tubular motors*

### *Top boxes and side plates*

### *Other shutter parts*

## Foam Filled Slats

### Sizes available:

- 37mm
- 42mm
- 55mm

With or without holes

Aluminum 3005

### Average quantity per 20' container:

- 37mm, 81 200 meters
- 42mm, 64 960 meters
- 55mm, 41 760 meters

### Product specifications:

- All sizes feasible.
- Designed for insulation benefits.
- Polyurethane foam.
- Baked enameled surface treatment.
- All RAL colors available.
- Suitable for all kind of installation:
  - Facade installation
  - Middle installation
  - Reverse installation

## Extruded Slats

### Sizes available:

- 36mm
- 58mm

With or without holes

Aluminum 6063T5

### Average quantity per 20' container:

- 36mm, 82 200 meters
- 58mm, 39 740 meters

### Product specifications:

- All sizes feasible.
- Designed for security benefits.
- Powder coating surface treatment.
- All RAL colors available.
- Suitable for all kind of installation:
  - Facade installation
  - Middle installation
  - Reverse installation

## Reinforced Slats

### Available sizes:

- 56mm

With or without holes

Aluminum 6063T5

High security slat against heavy wind area or for very unsafe place

### Average quantity per 20' container:

- 56mm, 38 500 meters

### Product specifications:

- All sizes feasible.
- Designed for high security benefits.
- Powder coating surface treatment.
- All RAL colors available.
- Suitable for all kind of installation:
  - Facade installation
  - Middle installation
  - Reverse installation

## Roller shutters

### Security or insulated roller shutter

#### TAILOR MADE

##### Available slats:

- Aluminum extruded
- Aluminum reinforced
- Aluminum foam filled

##### Available Controls systems:

- Wired tubular motors
- Built in radio tubular motors
- Manual override tubular motors
- Crank
- Strap

##### Available accessories:

- Anti lift systems
- Alarm system

##### Product specifications:

- Available with Foam filled, Extruded or Reinforced slats.
- Almost all sizes feasible.
- Powder coating or baked enameled surface treatment.
- All RAL colors available.
- Suitable for all kind of installation:
  - Facade installation
  - Middle installation
  - Reverse installation

## Combo window/shutter

### Security or insulated window/shutter

#### TAILOR MADE

#### Available slats:

- Extruded aluminum
- Foam filled aluminum

#### Available controls systems:

- Wired tubular motors
- Built in radio tubular motors
- Manual override tubular motors
- Crank
- Strap

#### Available accessories:

- Anti lift systems
- Toughened glass
- Alarm system
- Protection against mosquitoes
- Wooden frame

#### Product specifications:

- Double glazed window
- Side and top hinges
- Almost all sizes feasible: from 700X800mm to 3500X2900mm
- Powder coating surface treatment

## Tubular motors

### Wired motors, Built in radio motors, Manual override motors

- **Diameter 35mm** (from 3N.m to 10N.m)

Well adapted for projection screens and roller blinds

- **Diameter 45mm** (from 8N.m to 50N.m)

Well adapted for roller blinds, roller shutters and awnings

- **Diameter 59mm** (from 60N.m to 140N.m)

Well adapted for roller shutters, awnings and rolling doors

Different heads are available

Wired motors can also be radio controlled by adding **external radio receiver** (small upgrade, high benefit)

### Product specifications:

- *Certifications: ISO, CE, TUV, VDE, UL*
- *Tested for 10 000 life time cycle*
- *All RAL colors available*
- *Very easy to install*
- *Many accessories available*
- *Suitable for all kind of installation:*
  - *Facade installation*
  - *Middle installation*
  - *Reverse installation*

## Roller shutter top boxes and side plates

### Four sizes:

- 160 X 160 mm
- 180 X 180 mm
- 205 X 205 mm
- 250 X 250 mm

### Three shapes:

- Square BOX (Well designed for middle installation)
- Arc Box (More esthetic, well adapted for middle and façade installation)
- Round BOX (High esthetics, well adapted for façade installation)

Square

Arc

Round

### Product specifications:

- All sizes feasible.
- Designed for insulation benefits
- Aluminum 6063T5
- Powder coating surface treatment.
- All RAL colors available.
- Suitable for all kind of installation:
  - Façade installation
  - Middle installation
  - Reverse installation

## Roller shutter tube, transmission axle

### Three sizes:

- 40 mm (for 35mm tubular motors)
- 60 mm (for 45mm tubular motors)
- 70 mm (for 59mm tubular motors)

### Two shapes:

- Octagonal tube
- Round tube

### Product specifications:

- All sizes feasible.
- Steel axle
- Perforated and drilled
- Suitable for all kind of installation:
  - Façade installation
  - Middle installation
  - Reverse installation

## Other shutter parts

### Manual transmission:

- Crank system
- Strap system

### Tubular motors controls:

- Switch
- Remote control
- Timer
- Emergency crank

### Security accessories:

- Anti lift system
- Alarm system

### Guide rails:

- 54 mm
- 76 mm

### Bottom slat

### Idler

*For any other parts and accessories, please contact us.*
