LS903-1 Plastic Door Viewer

Door Viewer is a revolutionary new security device that can be easily installed in wood, fiberglass, or metal doors. It is designed to replace the standard peephole and give you the peace of mind of clearly seeing who is visiting. Unlike a conventional peephole, you can stand up to 2-3m back from the door to safely see out. Utilizing prism optics, the Door Viewer projects the outside image onto the view screen while maintaining your privacy and protection. You can see clearly out while visitors cannot see in. Children and those in wheelchairs love the Door Viewer since they can see out without having to reach up to a peephole, alerting others of their presence.

Specifications:

- 1) Three alternative specifications (3840, 3850 and 4450): 38mm and 44mm is the diameter of hole in the door for door viewer; 40mm and 50mm means the thickness of the door or less than 50mm.
- 2) 3840 and 3850 both adopt $\Phi 38$ mm door aperture, viewer diameter: 3840 (40mm), 3850 (44mm); 4450 adopts $\Phi 44$ mm door aperture
- 3) Dimensions (LxWxH) (mm): 80*70*70mm GW/NW: 130g/120g

Characteristics:

- a) Optical systems adopt complete optical lens and you can get clear and stable image
- b) Visual angle may reach 120° for easy observation
- c) It adopts fireproof engineering plastics so it is safe and reliable
- d) Special installation structure can effectively prevent the outside demolition of door viewer

Colors:

There are four colors for your choice: black, white, golden and silver

Packing:

100pcs/carton GW/NW: 13kg/12kg Dimensions: 43*41*32cm
Dimension: 420x380x300mm= 0.048 m³/carton
