On 2005 and earlier GL1800s pressing the A.SEL (RPT/RDM) button (or UM1 on European Models) while playing an MP3 device as a CD Changer may cause a lock up of the audio system. This is a defect in the 2005 and earlier GoldWing radio software and the only recovery is to disconnect the battery or remove the fuse to reset the motorcycle audio system. This does not apply to 2006 and later models.
