**Phone 1-434-846-7230 As for the phone number here it a family member who can get in touch with his sister who can get in touch with me if necessary he has nothing to do with this company, simple taken messages, but the day you deposited you letter of credit and the bank get in touch with me you have normal communication will go in place you get a call and all the normal communication between you company and mine will go in places**

## **Process for Start-up and Set- up to Accomplished Stabilization**

**the products being made in the country of China the household appliance all models, and the book being printed their the energy saver vent it being toll and modeled there, also the socket for the wrench set being modeled there, as you can see the vendor are from their making most of the components for startup I can get your their name if need all set up and bid in and selected start will be easy really and the tool for the dry wall restore and patch made their also, I've also component manufacture of the mess and paper line up for the dry wall patch and restore form all over including Viet Nam and other obviously if all order flow into the bank there will be multi plus vendor for all those think many have limited that we required more than they can made as to multi-vendor for all this stuck startup will be easy just mostly assembly at my home pant except for the doors and the extension for the wrench set will be total manufacture at my corporate headquarters and start ship plant were every that be it will be decide after start letter of credit are in the bank of which I will be using the bank of china for my corporate bank of which I know I other company can used that or any other bank on the plant that legist I leave the legist think up too you them the bankers, do not contact me put your**

**order and letter of credit in the any of you choice contact my bank they will be collecting the money if you bank if suitable to them it suitable to me, let them contact me , with an ax copy of the letter of credit to sign we start the process this until start over then if you prefer when regular communication are set up contact me but you will be dealing with my corporate bank anyway too get this process started , done this many time working for the company here command place to do it this way**

**What the hold waiting on you buy these product especially the one who send inquired asking permission to buy these product and it been given but just disappear with no expert nation at all**

**Simple send your order to and proof of pay to my corporate bank listed in my catalog they will fax a copy to my location where I meet with a banking official sign the letter of credit paper work then your get your product a fax copy remember it as good as a hard copy anywhere, then I goes the bank I the information concern in vendor and my hole plan to get these too you and we get started on the work as you can see with the vendor already pick and with the little fabrication I be doing in this startup of my own employee that the suck that old not being done in another location but completed fabricated at my plant that not of the shelve or simple haven to stay on top of a vendor to make sure they get the component they building right start will be very easy and you probably see them being ship to you in around 45 days**

**Sincerely**

**Harold C Christian**

**Signature:**

**Delivery Time for All Products  
Are as shown no exception**

**About 45 days on all products except the books 30 days should start to ship in about 30 days**

## **The Household Appliance Division**

**The new technology need to make this product available to you was developed by the owner and inventor of this corporation, All engineering and design work it done to create this technology, now to order simple send purchase order and deposited proof of payment in the form of a letter of credit in some bank and inform me and my corporate bank what and where the proof of payments it so we can verify it**

## **The Household Chicken Cutter: Patent pending # 1890)**

**An electronic household appliances)**

**White Model No. 340032-2008-1 EUR 125.00 or \$163.75**

**Black Model No. 340032-2008-2 EUR 125.00 or \$163.75**

**Green Model No. 340032-2008-3 EUR 125.00 or \$163.75**

**Prices includes instruction book, coupons and a small cook books 2 set of Blade plus a specialty spoon to remove chicken and shipping paid on all replacements due to default products or workmanship These products will cut up a whole fryer or chicken within 27 seconds or less with just the push of a button. They are Table top appliance about the size of a toaster oven or a Little Larger with fit a whole a chicken or small turkey Will cut in four different Blade arrangements this chicken cutter will save you \$ 2.50 to \$ 3.00 per. Chicken or bird in us dollar, that the different between What you would pay for a chicken or bird in the store in The us if you brought one already cut – up, but why do that when this machine will do it in 27 seconds Saving you All that money and work, and time, how could you customer Resisted this and As soon as your order I'll bring Case Engelen the President of Titoma who has 4 plants and A manufacture group there in Taiwan waiting to get started In the process of building**

**theses but you must contact me First because of a none discloser contract you could add As a market up of \$ 25.00 or more to this, you decide You know your clientele more than I'm this appliance Will still have jump off the shelf, and be below most Product**

**That are already setting in their house such as Coffee pot, that sell for \$300 or more and convection oven That sell for \$165.00, products that have everyone already has even with this Unheard of market-up for retail stores they still fly off The shelves, when your normal mark-up for Something likes \$5.00 dollar, not \$25.00 or \$30.00 and still below product that just hit one of the normal Requirements for a good consumer product, saving time,**

**Products will be made of food contact stainless steel and Plastic, There will also be three other different colors, This is the most need appliance for the home maker in Today's world, it actually will do the only task that the Home maker doesn't have a machine or some appliance Already to do that labor intense and costly and hard work, And dose it in 27 seconds, Notice the sale prices of the whole fryer a \$0.39 to \$0.50 saving per lb.**

**These product will go thru a endurances test here in America all household appliance will have to pass a 500 hour continually running test without failure so will all my product conform the that as a minimal standard Including no rust or degrade of material performances, electric chock or shorts or any kind of electrical problem that can cause fire or any kind of electrician situation or food contamination but go thru the rest not fail in any of these doing or after the test finished in order to pass, other words at the end of test these appliance must be operational without any problems**

**These test and grantee are made by the manufacture of these products over**

**News flash how true it what I said they so affair of you list en they trying to get me lock up again used my intelligent and avoid the individual out the blue had serious problem with me which means he someone send too actually pick a fight trying to get you in trouble it**

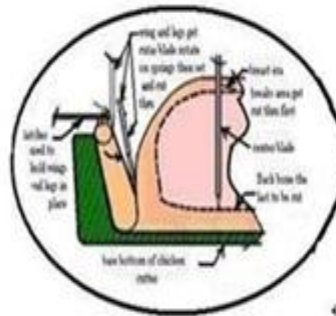

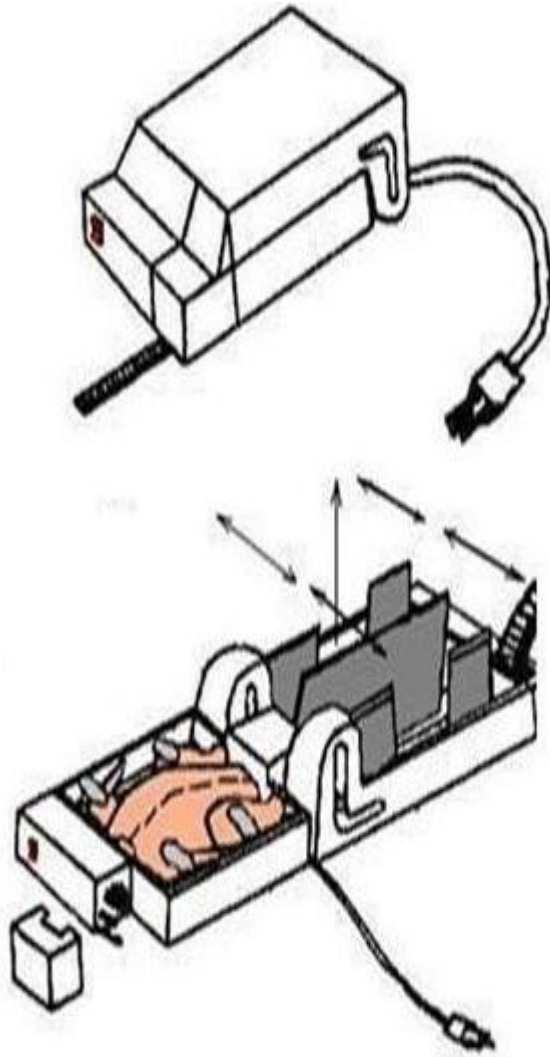

**what they do too you so you're not around like when they post that letters of credit for the household appliance to get set up out of here over there would be doing but you see they done so ,much I expect it when i closed to winning , being a ex veteran you must be carefully if you used violence's on a surf villain that you had no other coursed but too in order to save your life because of the hand to hand combat training you have but they try too induces fight to get you out of commission at time lie these but your see i aware of that can easy avoid such thinks, so good ahead post those letter of credit as you can see especially you super stores in Europe it only EUR 1,673,500.00**

**I a manufacture in Taiwan ( Titoma ) who done not need to set up a plant all ready to tool this up and start production which get product to start shipping to you in these within 45 days for this household appliance it just take an order of only 10,000 pieces get that start , that was supposed to be the front line product to get out on the shelve first in the store fund all the rest with those profit but sine I been delayed starting every think up together looking forward to you getting that letter of credit information to the bank of china so we can start , this quaintly of product will allow tooling cost and my cost too relocate over there and get every think else I need done here and there to accomplished completed started of all products as plan originally Customers of these supper store in Europe you know that just a EUR 1,673,500.00 not even a sample order for one of them and a few if you could have these product these appliance in the store on the way to you in 45 days, and the ensuing process my whole company would get set up and you spend years with new product s flown out to the shelve as long as I am able to do it really**

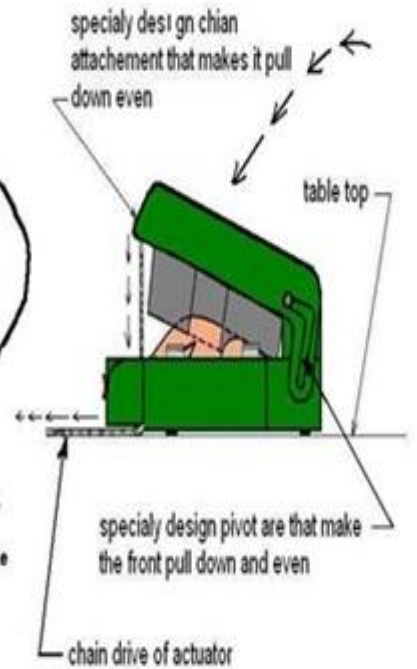

The screenshot shows the Allrecipes website interface. At the top, there is a navigation bar with links for Recipes, Menus, Tips & Advice, NEW! Community, and Shop. Below this is a search bar with the text 'Search Allrecipes.com' and a 'Search' button. A sidebar on the left lists 'Related Tips & Advice' including 'Tips and Advice', 'Cooking School', 'How-Tos', 'Meats & Grilling', 'Budgeting', and 'Photo Tutorials'. The main content area features a large image of a whole chicken on a cutting board. To the right of the image is the title 'Cutting Up a Whole Chicken' and the byline 'By: Allrecipes Staff'. Below the title is a short introductory paragraph: 'It takes more than one go at cutting up a chicken to become an expert. However, once you've got the hang of it, you can cut up a chicken in very little time and with hardly any effort at all! Perhaps the most important reason to learn how to cut up a whole chicken is that it will save you money. Buying a whole chicken is cheaper than buying pieces, and the leftover parts are ideal for forming the backbone of soup stocks. The same method can be used for cutting up other fowl like duck or squab.' Below the text are four numbered steps, each accompanied by a small image showing the step in progress: 1. Place the chicken breastbone-side up on a clean, flat cutting surface. 2. Use a standard, sharp kitchen knife to slice off the wing joints. The wings can be set aside and reserved for stock. One breast and leg is removed at a time. Follow steps 3 through 5 to remove the breasts and legs. 3. Make a shallow incision running along one side of the breastplate. 4. Deepen the incision by slicing into the chicken toward the rib cage. Pull the meat away from the rib cage as you slice down. As you progress further into the bird, slide the knife off of the rib cage repeatedly to ensure that you are removing any

TIME SAVED

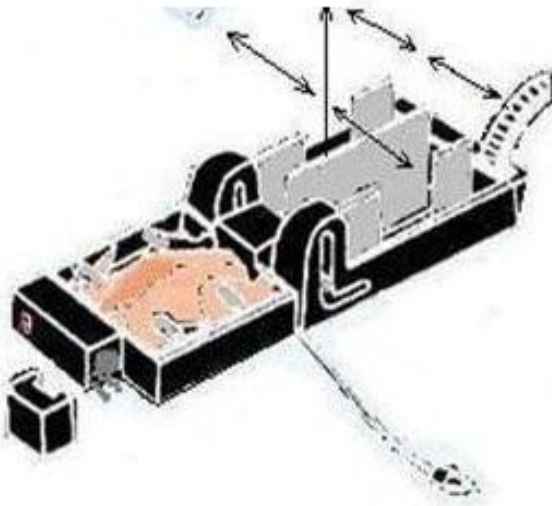

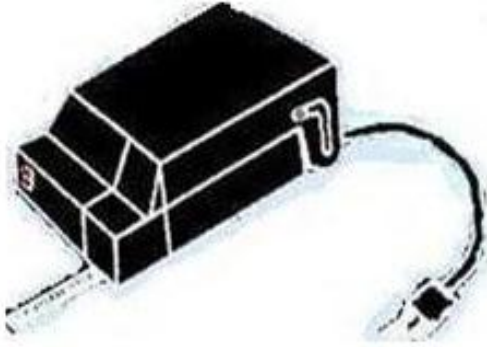

**You know my wife worked in retail and with an end cap a big open sale to blow out your first shipment with a TV demo going the woman will be fighting over this appliance no one will want to wait for a rain-Check**

Sorry sir

I'm not doing individual poems anymore I'll be publishing a book very soon of 50 Poems I be sure to let you know when that it available for purchases

As you know sense I'm writing a book with these poems they cannot win a contest

But thanks anyway

Thanks

I grantee this book and all the material it make with for wear and fading, for the life of the original owner, this book to meant as a keep sake to be hand down as a gift to love ones so it will be replace at no cost for any material failure if you're the original buyers, that a failure it

## Hope

One drudge thru day after day  
 Thought pressed on all sides  
 By common and uncommon trails and tribulations  
 Oppression of many diversity and different things  
 Follow in the content of their hearts  
 Being driven by that inner sprit  
 That yearning for the completion and the far fill meant  
 Of the content of the heart  
 Which comes with completion of all  
 Like a carrot golden and ripe  
 That caused you to presses on  
 And insure that you done fail  
 Surely, you press on  
 Hope in for things wished for  
 And things promises  
 Promises make thru the holy sprit  
 Promises that never disappoint.  
 Hope

Re: Our File No. 48560

Dear Mr. Christian:

I reviewed the patent information you sent me, which included the following patents issued to Harold Christian:

- #1890, issued 8/14/2001, for a *air filter*
- #2814, issued 12/27/2002, for a *door vent*
- #1646, issued 12/27/2002, for a *wrench*
- #2814, issued 12/26/2002, for a *dry wall patch*
- #2814, issued 5/23/2002, for a *screen door*

Provisional patent #1890 has expired, as of 8/14/2002. You also sent me a notice regarding non-provisional patent application, dated 9/10/2002, which appears to have been filed too late to extend the filing date for #1890. For the remaining provisional patents, you must file a corresponding non-provisional application, during the 12-month pendency period of the provisional application in order to benefit from the earlier filing of the provisional application. I have included information from the USPTO website regarding the process for Provisional Application for Patents.

You have asked for advice, in your fax cover sheet, stating you want me to supply information necessary to keep the patents activated or to finish the process if necessary. In order to keep your patents activated and to finish the process, you must file non-provisional patent applications for each of the provisional patents stated above, during the applicable 12 month pendency period. I have also included information from the USPTO titled "A Guide for Filing a Provisional (Utility) Patent Application." In that guide, the USPTO states: "A patent application is a complex legal document, best prepared by one trained to prepare such documents. After reviewing this guide, you may wish to consult with a registered patent attorney or agent."

My recommendation is the same. We would be happy to make a referral for you to a patent attorney in Kansas City, if you call or write me making the request for a referral. As a member of

COPY

a list of my patent as you can see the number match the number on these add so do the name they were all done by me and the patent also wrote by me to start this corporation so i could recieve the produce of my professional will hire staff and employee too maunufacture and sell these and other

## **Main Customers**

**Retail stores, hardware stores, super markets, discount stores, and Whole sales store of any kind do not sell to general public nor can this company spam any one sell too business customer only**

**This is a manufacturing company I sell products to anyone who will buy them min. normal order it 1000, but that a small normal order are usual larger,**

## **THIS IT THE NORMAL FOR START –UP**

**the products being made in the country of China the household appliance all models, and the book being printed their the energy saver vent it being toll and modeled there, also the socket for the wrench set being modeled there, as you can see the vendor are from their making most of the components for startup I can get your their name if need all set up and bid in and selected start will be easy really and the tool for the dry wall restore and patch made their also, I've also component manufacture of the mess and paper line up for the dry wall patch and restore form all over including Viet Nam and other obviously if all order flow into the bank there will be multi plus vendor for all those think many have limited that we required more than they can made as to multi-vendor for all this stuck startup will be easy just mostly assembly at my home pant except for the doors and the extension for the wrench set will be total manufacture at my corporate headquarters and start ship plant were every that be it will be decide after start letter of credit are in the bank of which I will be using the**

**bank of china for my corporate bank of which I know I other company can used that or any other bank on the plant that legist I leave the legist think up too you them the bankers, do not contact me put your order and letter of credit in the any of you choice contact my bank they will be collecting the money if you bank if suitable to them it suitable to me, let them contact me , with an ax copy of the letter of credit to sign we start the process this until start over then if you prefer when regular communication are set up contact me but you will be dealing with my corporate bank anyway too get this process started , done this many time working for the company here command place to do it this way**

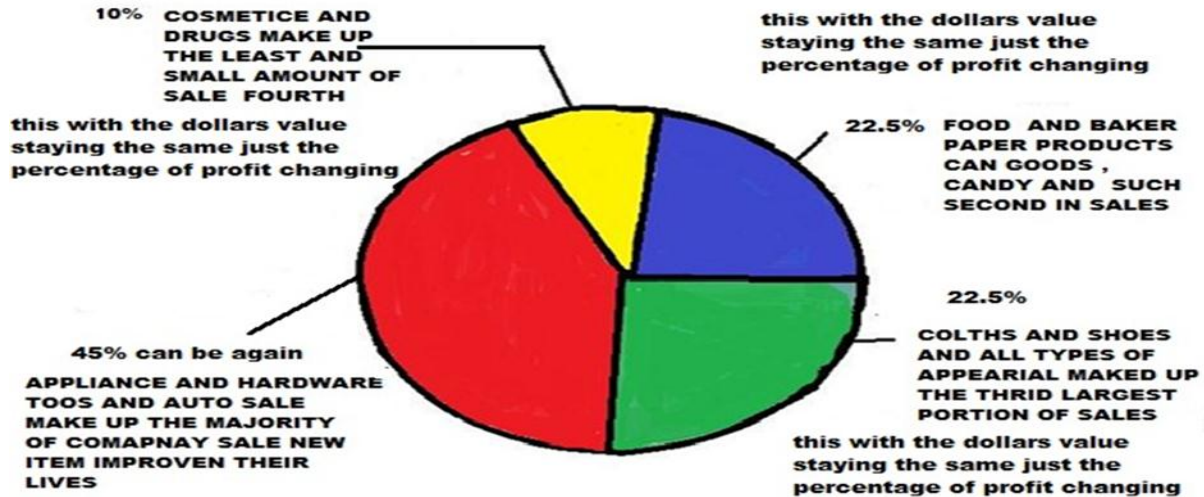

**What the hold waiting on you buy these product especially the one who send inquired asking permission to buy these product and it been given but just disappear with no expert nation at all**

**Simple send your order to and proof of pay to my corporate bank listed in my catalog they will fax a copy to my location where I meet with a banking official sign the letter of credit paper work then your get your product a fax copy remember it as good as a hard copy anywhere, then I goes the bank I the information concern in vendor and my hole plan to get these too you and we get started on the work as you can see with the vendor already pick and with the little fabrication I be doing in this startup of my own employee that the suck that old not being done in another location but completed fabricated at my plant that not of the shelve or simple haven to stay on top of a vendor to make sure they get the component they building right start will be very easy and you probably seethes hitting you dock in about 45 days but too be safe I allow or telling everyone 75 days HCC (Specialty Products) Limited Liability Corporation, Finials officers**
