

Company Introduction

Each division of the group is driven by a zest to be at the forefront of its sector. Each facet of service functions as a distinct identity and is professionally managed by a team of qualified experts. Yet, every unit is bound together by a common thread of values. The fulcrum of the entire group rests on a sound business model that emphasises the need to enhance quality in order to achieve consistent, sustainable growth.

Through thirty years of servicing the requirements of local giants like DUBAL, the Dubai Ports Authority, the Dubai Petroleum Company and Emirates Airlines, the Bin Dasmal Group has been able to establish a powerful presence in the Middle East.

Collaborations with market leaders in the USA, Canada, UK, Europe, Pakistan, India and China also reflect the group's initiative to adapt to the evolving demands of its international clientele.

From solution providers for businesses, to becoming an integral part of consumer lifestyles; from a vision created in Dubai, to a group with a growing international presence, the Bin Dasmal Group is about building relationships, expanding horizons, elevating standards and defining quality.
