OXY TEXTILE LLP

About the Company

OXY TEXTILE is one of first successfully implemented projects in the territory of Ontustik FEZ in Shymkent in the frameworks of textile cluster. Complex automated spinning-twisting machine for production of carding and combed cotton yarn is designed for processing of Kazakhstani raw with the purpose of issuing ready products with high added value. So, for instance, for obtaining of cotton yarn, the raw materials have to undergo 2 process stages, and in the result the added value of the ready product will be 4 times increased. Besides, the produced carding and combed cotton yarn is fully exported to European countries. Products of Oxy Textile have good competitive advantages. Production process is completely automated and the equipment does not have analogues in Kazakhstan.

Products

Cotton yarn manufactured with the help of ring spun (carding, combed). Product characteristic: yarn consisting for 100% from cotton fibers, carding, combed, twisted in two or three yarns.
