Olive Oil Skin Care Products

The Secret of Natural Beauty

Olive Oil SKIN CARE PRODUCTS

For thousands of years the ancient Greeks have used olive oil, herbs, and other botanicals to effectively care for their body, skin and hair. According to mythology, olive oil was the secret to Aphrodite's great beauty. Hippocrates called olive oil the Great Therapeutic because of its great health and healing properties. Numerous scientific studies confirm Hippocrates faith in olive oil. They have found that consuming olive oil lowers the risk of cancer, reduces blood pressure, and slows the aging of internal organs and body tissues. Olive oil is not only healthy for consumption, but also is effective as a skin and hair care product.

The ancient Greeks, renowned for their knowledge and beauty, used olive oil in conjunction with other herbs to help maintain skin beauty, fluidity, and grace.

We at Aphrodite honor our ancestors by taking these same traditions and combine them with modern day techniques to manufacture a line of skin and hair care products that is effective for all skin and hair care products that is effective for all skin and hair types.

After many years of research and experience in olive oil and its various properties we have created a wide selection of skin care products which provide protection, nourishment, and overall better health for your skin. See the difference Aphrodite olive oil products will make in your life.

..... Timeless beauty. Naturally.

Aphrodite was founded in 1994 and is headquartered on the island of Crete in the southern region of Greece. We produce natural fourth milled olive oil soaps and skin care products. Our consumers will shop for Aphrodite products in pharmacies, grocery, gift and specialty stores, as well as select department stores.

We also seek out spas, high-end beauty salons, as well as specialty cosmetic stores to service our consumers.

We specialize in serving those who demand only the highest quality in their skin care products. Aphrodite is well aware that these consumers seek quality skin care products without parabens, artificial coloring, animal fats or alcohol. Aphrodite is here to provide these discriminating consumers with just that unique distinction...

We began exporting our products in 2000 and our export demand has rapidly increased. As of 2008, Aphrodite products have been introduced in more than thirty-five countries worldwide. Aphrodite's greatest export demand is primarily focused in the European and U.S. markets. Additionally, we recently entered the Asian market.

In the Greek market alone, Aphrodite is a leading olive oil skin care company and enjoys an increasingly growing percentage of the total natural skin care product sales. Because of our expanded growth and demand, we have built a new production facility in Heraklion Crete Greece to be able to supply all our consumer demand in the worldwide marketplace.

With this new production plant we cannot only meet the demands of our customers worldwide, we have the capacity and capability to provide complete private label services as well.

As consumers are becoming more conscious about their health and are taking greater strides in their personal care, we at Aphrodite take pride in providing our health care products to our consumers. Aphrodite is here to provide our excellent product line and services to those who want only the very best in total body care.

Experience the difference olive oil skin care can make in your life.

..... Experience the difference 4000 years of history makes.

www.aphroditeskincare.com

The olive tree and olive oil have a long history in Greece. It is considered to be the most beneficial of all vegetable oils. According to Hippocrates it can be used for more than 60 pharmaceutical uses. After extensive research, it has been found that olive oil is rich in vitamin E, polyphenols, and numerous antioxidant components that aid in scavenging free radicals and moisturize the skin thoroughly.

paraben free

Chamomile

Mild with a light, spicy sweet aroma Chamomile is a proven anti-irritant that is good for sensitive skin. By soothing eczema or other allergic reactions it can also help with itching and soothing skin irritations.

Thousands of years ago crushing olives was done by hand using a spherical stone wheel. Today a similar method is used as olives are crushed by mechanical stainless steel wheel. A gentle filtration process is then used to remove sediment along with other impurities. This procedure allows olive oil to be produced as "Extra Virgin" olive oil and is virtually chemical free.

paraben free

The history of the olive tree and its traditions date back to the first years of civilized life on earth. The first cultivation of the olive tree in the world took place on Greece; more specifically the island of Crete. This happened about 3500 BC in the early Minoan times and in this period the olive tree was in a wilder form compared to how we know it now.

packing details

PACKING INFORMATION

For safe and easy transportation, we package our products in small storage boxes and then place 2-9 of those in larger shipping cartons. Because our products vary in size, we have different storage boxes and shipping cartons. This allows us to minimize shipping space for large orders that need to be uniformly packaged such as pallets. Our guide will demonstrate the packing system we use from the inside out. It can be helpful when placing orders as it will make it easy to know which products are placed in each box/carton size and their exact quantities. To eliminate delays and achieve safe shipping, it is advised to place orders that are made so that the number of storage boxes will fill shipping cartons. It should be noted that the shipping carton could include more than one type of products as long as their storage boxes fit in the same shipping carton.
