

Fuzhou Xiangsheng Footwear Co., Ltd

Established in 1986, Fuzhou Xiangsheng Footwear is now supplying 90 percent of its output of EVA garden clogs, EVA slippers; beach sandals and V-strap flip flops to the US, Europe, Southeast Asia, the Middle East and South Africa. We' ve accumulated vast industry and market knowledge in the last two decades. Buyers in more than 30 countries trust our experience. You should too.

We process our EVA raw materials in-house, slashing our FOB prices even further. Offering you cost advantages does not come at the expense of product quality. In fact, because we produce our own raw materials, we' re able to ensure superior quality consistency. We' re equipped with 19 production lines and EVA injection machines from Taiwan. And all our operations are ISO 9001:2000-certified.

With two decades of experience in making EVA slippers and we are very professional in making EVA garden clogs now (original clogs, clogs with decoration, two-tone clogs, mixed-color clogs and more), we are a pillar of the footwear industry in Fujian, mainland China' s footwear center. Each month, our factory turns out more than 2 million pairs of slippers and sandals, with five long-term partner factories providing additional manufacturing support.

Whether you choose from our 30-plus models or consult with our designers to develop your own styles, you can bet that you will receive stylish slippers that will sell well in your markets.
