Our Strength

You can easily estimate our strength and forecasting abilities, imagining a company & unchanged single team that have dealt with millions of peoples. We request you to search the web regarding what people discuss about us at forum and social media sites. You will also feel proud reading appreciations & blessings for us. Many users of our accounting software express their bad experience with other software and advancement with simplicity in ours. Our Accounting, Inventory & Management software are being used by many categories of business. We have perfect readymade software packages for almost 50+ businesses categories. Cleantouch is the first Software Company of Pakistan that is involved in much more financial and management sectors as The Digital Consultant.

Technological Diversions

Advancement is key factor for any IT companies to maintain its creditability. The technology was not advanced as it is being in recent 2-3 years. We accepted & ready to accept this change as challenge and are continuously striving not to lose our reputation as an IT company of both home & business users. After developing hundreds of application using Visual FoxPro, we are now moving forward the technology called Visual Studio .NET, that is compatible with upcoming tools and technologies for next 10+ Years. We have developed all our famous applications using this platform and have integrated many new features in almost all the Business Applications based on needs of the time, feedback by the customers from past 10 years, experience & vision of team & most of all by the Grace of Allah.
