XTC

XCT utilizes revolutionary micro-alloy heating fibers that do away with primitive wiring and result in COIL-FREE, LIGHTWEIGHT heated clothing. The heating panels are soft, pliable, and ultra-thin. They evenly distribute energy-efficient, single-sided radiant heat to ensure that heat will stay next to the body where you need it the most.

MISSION STATEMENT

To design and produce heated lifestyle products with safe & effective technology which provides warmth, comfort and wellness to our customers.
