COMPANY PROFILE

WD & BUILDERS has been in the business of providing quality products and services to our valued clients from both private and government sectors for more than a decade. Established in 1999 we remain as one of the pioneers in the polycarbonate roof importation as well as metal frame & structure building to suit the requirements of the natural lighting in the industrial, manufacturing, agricultural, marine and private sectors in the Visayas and Mindanao. Through dedication to our customers, perseverance, and hard work, we have instantly surpassed sales of larger polycarbonate importers both local and multinational. For two years now, WD&J Builders has already conquered NCR-Luzon and has proven its position as a leader in the polycarbonate industry in the country in terms of quality and pricing by applying the same principles that the company has been using throughout the toughest years in the business.

Proof to our success is the existence of WD&J Builders in the four corners of the Philippine Archipelago:
